Skills

- Regression testing | Test management tools | Software testing | Problem-solving | User experience (UX) testing | Desktop app testing
- Postman | Test automation | Programming languages | Test management | Test strategy and planning | Requirements analysis
- Mobile testing | Katalo studio | Defect management | Test reporting and metrics | Continuous integration and continuous | Security testing
- Performance testing | API Testing | Python selenium| selenium IDE | SQL/Database Knowledge | Test planning and documentation
- API Testing | C++ | JavaScript | English, Malayalam, Tamil - All professional proficiency or above

Experience

QA engineer

[IT Platforms](#)

04/2024 - Current

- Executed manual test cases for various software applications, identifying critical bugs and issues
- Assisted in developing automated test scripts using Python and Selenium, improving test coverage.
- Maintained and updated bug tracking systems, providing clear and concise defect reports.
- Worked closely with developers to reproduce issues and validate fixes, ensuring resolution prior to release.
- Participated in user acceptance testing (UAT), gathering feedback from end-users to refine product features.

QA engineer

[Skyislimit](#)

11/2022 – 04/2024

- Manual Testing: Conducted manual software testing, executed 500+ test cases, and successfully identified critical defects, resulting in improved product stability and reduced customer complaints.
- Automation Testing: We have implemented an automated testing framework using Selenium and Postman, reducing test execution time by 70% and ensuring 100% test coverage across 300+ test cases.
- Mobile Application Testing: Ensuring the functionality and compatibility of mobile apps on various devices and platforms.
- Desktop Application Testing: Testing software for desktop environments to ensure functionality and performance.
- Website Testing: Evaluating web applications and websites for functionality, usability, compatibility, and performance.

ASSISTANT PRODUCT MANAGER

[Avodha](#)

06/2022 – 11/2022

- IAs an Assistant Product Manager at Avodha, I play a pivotal role in driving the success of our product offerings by collaborating closely with cross-functional teams to deliver innovative solutions that meet customer needs and drive business growth.

QA engineer

[Avodha](#)

08/2021 – 6/2022

- Backend Testing: We have implemented rigorous backend testing procedures, including stress testing and vulnerability assessments, resulting in a 50% decrease in security vulnerabilities and ensuring seamless backend operations for a high traffic application.
- Manual Testing: ensuring software quality through comprehensive test case execution and defect identification.
- Automation Testing: Spearheaded the adoption of the Test Complete tool, resulting in a 50% reduction in manual testing efforts and saving 20+ hours per week.

Education

Diploma

12/2021 - 06/2022

- **Computer Operator & Programming Assistant**
- Gained extensive training and successfully completed all courses for Computer Operator and Programming Assistant

Vocational higher secondary

Computer science

- President of the Computer Science Student Club Staff
- Member of the Student Government

Projects

- Website vulnerability (12/2020 - 01/2021) No rate limit website vulnerability. Link to [GitHub](#)
